* Lending data are not shown separately for the 69 towns that consist of only part of a census tract (in one case, a town -- Winchendon -- contains one complete tract, but shares a second tract with another town). Census tracts are the smallest unit for which lending data are reported under the Home Mortgage Disclosure Act (HMDA). In these cases, the towns have been placed into 23 groups that fall within census tract boundaries; most of these groups consist of two towns, but in two instances six towns share a single census tract. These groups are shown at the end of each county's alphabetical listing of towns. In some cases, space limitations required cryptic abbreviations.

* Lending data are not shown separately for the 69 towns that consist of only part of a census tract (in one case, a town -- Winchendon -- contains one complete tract, but shares a second tract with another town). Census tracts are the smallest unit for which lending data are reported under the Home Mortgage Disclosure Act (HMDA). In these cases, the towns have been placed into 23 groups that fall within census tract boundaries; most of these groups consist of two towns, but in two instances six towns share a single census tract. These groups are shown at the end of each county's alphabetical listing of towns. In some cases, space limitations required cryptic abbreviations.

When no loans were made to black and/or Latino borrowers in a town, the corresponding cells for "% High-APR" and "High-APR Share Disparity Ratio" are marked "na," for "not applicable." The cell for "High-APR Disparity Ratio" is also marked "na" when the "% High-APR" for white borrowers in a town is 0.00%.

* Lending data are not shown separately for the 69 towns that consist of only part of a census tract (in one case, a town -- Winchendon -- contains one complete tract, but shares a second tract with another town). Census tracts are the smallest unit for which lending data are reported under the Home Mortgage Disclosure Act (HMDA). In these cases, the towns have been placed into 23 groups that fall within census tract boundaries; most of these groups consist of two towns, but in two instances six towns share a single census tract. These groups are shown at the end of each county's alphabetical listing of towns. In some cases, space limitations required cryptic abbreviations.

When no loans were made to black and/or Latino borrowers in a town, the corresponding cells for "% High-APR" and "High-APR Share Disparity Ratio" are marked "na," for "not applicable." The cell for "High-APR Disparity Ratio" is also marked "na" when the "% High-APR" for white borrowers in a town is 0.00%.

* Lending data are not shown separately for the 69 towns that consist of only part of a census tract (in one case, a town -- Winchendon -- contains one complete tract, but shares a second tract with another town). Census tracts are the smallest unit for which lending data are reported under the Home Mortgage Disclosure Act (HMDA). In these cases, the towns have been placed into 23 groups that fall within census tract boundaries; most of these groups consist of two towns, but in two instances six towns share a single census tract. These groups are shown at the end of each county's alphabetical listing of towns. In some cases, space limitations required cryptic abbreviations.

Note: See Supplemental Table 2 for the numbers of loans to blacks, Latino, and white borrowers in each community that were used to calculate this table's percentages.

* Lending data are not shown separately for the 69 towns that consist of only part of a census tract (in one case, a town -- Winchendon -- contains one complete tract, but shares a second tract with another town). Census tracts are the smallest unit for which lending data are reported under the Home Mortgage Disclosure Act (HMDA). In these cases, the towns have been placed into 23 groups that fall within census tract boundaries; most of these groups consist of two towns, but in two instances six towns share a single census tract. These groups are shown at the end of each county's alphabetical listing of towns. In some cases, space limitations required cryptic abbreviations.

Note: See Supplemental Table 3 for the numbers of loans to blacks, Latino, and white borrowers in each community that were used to calculate this table's percentages.

* Lending data are not shown separately for the 69 towns that consist of only part of a census tract (in one case, a town -- Winchendon -- contains one complete tract, but shares a second tract with another town). Census tracts are the smallest unit for which lending data are reported under the Home Mortgage Disclosure Act (HMDA). In these cases, the towns have been placed into 23 groups that fall within census tract boundaries; most of these groups consist of two towns, but in two instances six towns share a single census tract. These groups are shown at the end of each county's alphabetical listing of towns. In some cases, space limitations required cryptic abbreviations.

Blank cells indicate that no applications from Asian, black, and/or Latino borrowers were reported for that town. In these cases, the corresponding cells for the denial rate and the denial rate ratio are also blank.
